Health history for hair test 1000

20 year old male from Atlanta, Georgia.

5 foot 10 inches, weigh 160 pounds.

Adrenal gland fatigue, candida problems, hypothyroid, epstein barr virus, new allergies to gluten, peanuts, and eggs.

Grew up with acne and took antibiotics for that, had head gear for 3 years(no braces or fillings).

Mom has fillings and had them when I was born.

Was always very shy growing up and easily embarrassed(still am).

Had all regular vaccines done including before college 2 years ago(became depressed two months afterwards).

At time of hair test I was using head and shoulders and taking a zinc supplement which could explain the high zinc.

Thank you so much!
