#### What are your current symptoms and health history?

- Tremors in both hands, subtle.
- Vision issues (halo left eye) started within a month or so of the dump event.
- Muscle weakness, atrophy, and fasciculations (mostly right leg) started within a month or so of the dump event.
- Chronic fatigue (started immediately after dump event)
- Intermittent breathing issues (ended up in ER once)
- Hypothyroidism (came on in months following dump event)
- Alopecia (started right after "dump" event occurred)
- Constipation (new for me)
- Irritable, low patience (new for me)

Prior to dump event, was health, avid outdoors person.. mountain bike, run, hike, etc.

## Dental history (Wisdom teeth removed and when? Any other extractions. First root canal placed? Braces? First amalgam etc...)

No cavities. No metal in mouth

## What dental work do you currently have in place? What part of the dental clean-up have you completed?

None

#### What dentistry did your mother have at any time before or during pregnancy? Multiple fillings

## What vaccinations have you had and when (including flu and especially travel shots)?

Too many to mention. Army shot me full of garbage in addition to childhood vaccines

# Supplements and medications (including dosages) taken at time of hair test, or for the 3-6 months before the sample was taken?

Can't recall now the specifics, but many vitamins and minerals, as well as amino acids.

#### What is your age, height and weight? 42, 64", 190

#### Other information you feel may be relevant?

My symptoms came on like a ton of bricks. Far worse and longer list than what is noted above. Hit after eating a health food bar made of spirulina. Prior to that, started to notice minor hand tremors. Otherwise was healthy and an avid active outdoor guy with plenty of exercise.

Was a heavy heavy fish water for 15 years.

#### What is your location – city & country (so that we can learn where certain toxins are more prevalent).

Simi Valley, CA, USA
