Health history for hair test 226

1) What are your current symptoms and health history?

Chronic fatigue for over 15 years, very poor concentration and memory, very delayed and uncontrollable sleep cycle, no energy. Other family members (father, sister and husband) toxic with mercury.

2) Dental history (wisdom teeth removed? First root canal placed? Braces? First amalgam etc...)

Bottom left wisdom tooth removed while young. First root canal at 12. Never worn braces. First of 12+ amalgams at age 7-8.

3) What dental work do you currently have in place? What part of the dental cleanup have you completed?

Total mouth cleanup completed beginning 2007.
7 unsafe removals between March and July 2006 (1-2 fillings a month).
I have 2 top zirconium bridges (over 3 and 5 teeth respectively per side)

4) What dentistry did your mother have at any time before or during pregnancy?

Few amalgams, few root canals.

5) What vaccinations have you had and when (including flu and especially travel shots)?

Childhood routine, don't remember any travel shots.

6) Supplements and medications (including dosages) taken at time of hair test, or for the 3-6 months before the sample was taken.

Milk thistle 1 tab at each meal, zinc citrate 15 mg twice, magnesium citrate powder 400 mg, Chromium picolinate 200 with breakfast, probiotics before breakfast, cod liver oil 1 gram, Phosphatidilserine 300 mg.
1 multi vits+mins tab; no copper (Cangurini-Solgar), few homeopathic drops 3xday

7) Other information you feel may be relevant?

Done just over a year on ALA alone (50 mg as per Cutler Protocol). Added 50 mg DMSA to ALA for 3 consecutive rounds in October 08. Also done 3 months extracellular chelation with EDTA during spring 07, before ALA. Born with a very strong allergy to nickel, acquired gold allergy esp. after a triple gold/ceramic bridge has been in place for some 20 years (at age 20) Took it off beginning 2007, one amalgam underneath was dissolved. The root canal sealed with amalgam below gum line left a gum tattoo (now removed). At 12 I had a sudden rise of white blood cells, treated with monthly penicillin injections. Hyperactivity and flattened mood followed from 15 to 18 years of age. At 18 the cap over the amalgam filled root canal was so unbearable it came off as I 'poked' it, so the root canal (top right, next to canine) was taken out. A triple gold bridge was put on it 2 years later.

8) What is your location - city & country (so that we can learn where certain toxins are more prevalent).

I live in Bologna, northern Italy, a fairly industrialised city just above sea level partly surrounded by hills/lower mountain range with 92/95% humidity rate and over last 10 years horrid traffic pollution.
