Health history for hair test 320

1) What are your current symptoms and health history?

I've had menopause type symptoms of night sweats and mood issues with irregular cycles and digestive / gallbladder / liver issues for two years. I did a liver gallbladder cleanse for two weekends in a row as I was really nauseated and my Dr. Suggested this. The Tuesday after doing the last cleanse, I cracked a molar containing amalgams. I immediately began having tremendous night sweats and a burning sensation on the left side of my throat - underneath the tooth. Thinking I had a tooth infection - over a weekend, I went to a quick clinic who gave me a Z pac antibiotic.....no positive results.

I went to an ENT who said nothing is wrong - absolutely nothing - and refused to do any testing - referred me to a neurologist. I have since learned of parotitis, which is a staff infection of the parotid gland (salivary). Heading to new ENT to see if this is the case behind the burning down my neck.

About a year ago, I awoke with a flu type symptom that kept me in bed for the day. Legs felt weak, but no fever and nothing else. This has continued off and on the last year.

I had a dream prior to cracking my tooth, where I saw Jesus and he was telling me to have my amalgams taken out. I had a second dream and I was complaining of this area of burning, and I heard until you deal with this, your weakness will not leave.

So, two weeks after cracking the tooth my holistic dentist properly removed 4 amalgam fillings and put temporaries in place. Only one thing, he forgot to tell me to go to my doctor and have a vitamin C IV. I went to the bottom physically.

Luckily, my lawyer has dealt with amalgams poisoning for 5 yrs. She gave me Andy Cutler's book and sent me to her homeopathist, who is helping me detox until I can get the other amalgams out.

2) Dental history (wisdom teeth removed? First root canal placed? Braces? First amalgam etc...)

Amalgams started at age 6 and continued until 1999.

3) What dental work do you currently have in place? What part of the dental cleanup have you completed?

I still have two small fillings left on the left side and four more molars to have replaced on the right side with crowns. Saving my pennies up.

I have root canal that was previously done by another homeopathis dentist with proper amalgam extrusion, but the crown he put on never fit properly and it was the tooth underneath it that cracked as well as part of the new crown.

4) What dentistry did your mother have at any time before or during pregnancy?

No knowledge.

5) What vaccinations have you had and when (including flu and especially travel shots)?

I had the swine flu vaccination in 1977 - and have avoided them like a plague since then.

6) Supplements and medications (including dosages) taken at time of hair test, or for the 3-6 months before the sample was taken.

Ton of stuff - I'm a patient of Dr. Eric Braverman, who is the brain guru in NYC and anti-aging specialist. My blood tested high for mercury in June, and he thought nothing of it as he said everyone in NYC tests high.

7) Other information you feel may be relevant?

Sometimes I am symptom free.....other times I am so weak, my husband is pushing me in a wheelchair. The sauna really seems to help me. I feel energized afterwards. Please tell everyone that the FIR carbon heater sauna is the best - its like a finnish sauna. \$2,000 from LuxSauna - the one the Hippocrates health institute uses for cancer patients to make them sweat.

8) What is your location - city & country (so that we can learn where certain toxins are more prevalent). Orlando, FL for 10 years....Dallas,TX for 20 years....west TX before that.
