Health history for hair test 557

- 1.I had begun feeling ill 15 years ago with pounding in my body which I then believed to be heart, but now feel it is adrenal issues. After seeing countless drs for everything from hormonal to heart to allergists, gastro drs...I had no diagnosis. My current symptoms include brain fog, mouth pain and pressure,gastro..constipation,gas bloating,weight gain, insomnia, back pain, candida, eczema, lack of concentration, anxiety, social withdraw, reflux, hormone imbalance (close to menopause) many quirky personality issues, hypoglycemia, many food intolerances, losing hair
- 2.3. Wisdom teeth removed 1989?, no braces..6 amalgams, 1st removed Feb 2011..2&3 removed March 2011.. 4th removed April 2011..5th 6th removed Nov 1,2011. Bonding agent 1984.. 4 front teeth bonding was redone in 2010 and is now chipping, I have had 9 repairs in the last year..could this be incompatibility with bonding material.
