Health history for hair test 639

1. past medical history...

no antibodies to thyroid yet had very low free t3 levels so we started treating with cytomel, her reverse t3 was also very high

low adrenal function...needed to take ace or isocort to compensate at age 3 months she began reoccurring ear infections (damn vaccines) very fussy infancy

had speech issues and required speech therapy...articulation issues as well as mixing up syllables

dx'd with adhd and mild dyslexia

at age 10 yr she started having SEVERE anxiety and derealization issues..we did NOT seek medical help as i by this time had learned too much about meds and vaccines and so i treated her myself with t3 meds, ace, b complex fish oils, iodine selenium etc...those symptoms completely resolved and she became a happy secure child again

in school some attention issues, slow to learn to read, issues with memorization

current history...

no antibodies to thyroid but remains on thyroid meds combo of naturethroid and cytomel due to low ft3 and its affect on her adrenal function off ACE but is using paul robinson's protocol (circadian method) which uses t3 meds to increase adrenal output..this med is given in wee morning hours before waking time

still some mild issues in focus still finds it hard to listen in class and to memorize hard time with organization

- 2. only dental history are braces removed in early 2011..wears a plastic retainer some nights..never any cavities
- 3. only wears retainer at bedtime...we learned our lesson..we avoid dentists and doctors!!
- 4.during pregnancy mom had 2 very small almagam fillings...DAMN!...these were old at time of this pregnancy and had been in place almost 20 yrs by this time...i had no dentistry done during pregnancy
- 5. vaccinations started at 3 months just like all obedient but dumb mothers do....had all of them...mmr, dpt, hepatisis series, polio, hib, even got this kid chicken pox..

last vaccine was at age 5 yr in 2003

never has had flu shot

6. supplements and medicines

thyroid meds...naturethroid and cytomel

isocort ...on it for part of this 3 month period no longer on it by time of hair test ..was stopped in favor of circadian dosing of t3

thorne basic b complex with mthfr folate, methyl b12 p5p etc methylcobalamine

selenium

iodoral

fish oil..krill and/or clo

vitamin d3

vitamin e..natural

iron as needed and it is needed periodically

probiotics

multivitamin whole food with digestive enzymes

- 7. age 14 yr 11 months height 4' 4.5" weight 111 lbs
- 8. at this time her struggles in school with focus, and staying on task are a concern...also she has not yet started her period and that is starting to concern me a bit...
- 9. san antonio, texas USA
